PROFIL

Recent Computer Science and Networks Engineering graduate with a strong interest in full-stack software development. Through multiple internships, I have gained hands-on experience building web and mobile applications, developing backend APIs, and working across the full software development lifecycle. I am currently seeking my first full-time opportunity as a Software Engineer.

EDUCATION

Bachelor's degree in Distributed Information Systems (SIR), <i>Faculté des Sciences et Techniques de Marrakech (FSTG)</i>	2023 – 2024 Marrakech
Engineering degree program in Computer Science and Networks (MIAGE), <i>École Marocaine des Sciences de l'Ingénieur Marrakech (EMSI)</i>	2024 – 2026 Marrakech

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, Ouz Communication, Technologie & Innovation Key Responsibilities - Contributed to the development of multiple web and mobile applications. - Developed backend APIs and business logic. - Built web and mobile features using React and Flutter. - Implemented business features and collaborated throughout the software development lifecycle. Technologies Node.js, React, Flutter, Spring Boot, PostgreSQL, Git, Jira, Docker	02/2026 – 08/2026 Marrakech
Full Stack Web Developer Intern, AMSOFT Evoleo Key Responsibilities - Contributed to the design and development of a web application that automated data extraction from invoices (PDFs and images). - Integrated YOLO for key field detection and PaddleOCR for text recognition. - Developed an administrative interface for user management. - Reduced invoice processing time from 10-15 seconds to 3 seconds by automating the insertion workflow. - Achieved 92% extraction accuracy and implemented an automatic notification system for detection errors. Technologies Python, FastAPI, PaddleOCR, YOLO, Label Studio, React, MySQL	07/2025 – 08/2025 Marrakech
Full Stack Web Developer Intern, Tenmar Petit Bateau Key Responsibilities - Contributed to the development of an internal web application for planning and monitoring workloads across multiple departments within the factory. - Collaborated with stakeholders to analyze requirements and define functional specifications. - Developed backend services using Spring Boot and frontend features using Angular. - Implemented task management and workload distribution features to improve operational efficiency. Technologies Spring Boot, Angular, SQL Server	04/2024 – 05/2024 Marrakech

SKILLS

Technical - Programming: Java, JavaScript, TypeScript, Python, Dart, SQL. - Tools: Git, Docker, Kubernetes, Jenkins, Jira, UML - Databases: PostgreSQL, MySQL, SQLServer, MongoDB. - Frameworks: Spring Boot, NestJS, Next.js, Angular, Flutter, FastAPI - Testing & Quality: JUnit, JMeter, Selenium, SonarQube. - ORMs: Prisma, Hibernate/JPA.	Soft - Problem-solving - Analytical and logical thinking - Continuous learning - Technical adaptability
